

Information on Cookies

Cookie are small text files that servers send to users' computers. They can be memorised on your computer and employed to enhance and personalise navigation, as well as to provide relevant information the next time you visit the same website.

Cookie Types

The cookies we use can be divided into the four following groups:

Session Cookies

They are used to recognise the language which is being visualised, and to maintain this language throughout navigation. They also enable the creation of personal accounts and login information. These cookies are necessary in order for the website to function correctly.

Functional Cookies

They are used to memorise the products added to the Shopping Bag during one or more internet sessions, for a limited amount of time. These cookies are necessary in order for the website to function correctly.

Analysis Cookies

They are used by web traffic analysis tools (such as Google Analytics). They enable the analysis of users' navigation method and to comprehend users' interaction with the website. The data collected is always anonymous.

Marketing/Retargeting Cookies

They are used by third party companies to enable the visualisation on the browser of banners from external affiliate sites. The products shown will be similar to the ones viewed by the user on the current website.

Deleting Cookies

Internet browsers usually accept cookies automatically, however it is always possible to disable this functionality and to remove saved cookies. Please view your browser settings, as each browser type and version will have a different settings panel. We suggest you check the specific manual or help sections of the program you are using.

Useful Websites

To verify your current settings and preferences we can suggest the following link:

<http://www.youronlinechoices.com>

For more information on how to manage cookies according to browser type, please read:
